<https://linkedin.com/in/iroushan/> | <https://rous-hann.github.io/>

Senior Business Intelligence Consultant specializing in taking on data environments with no governance and leaving them with scalable Master Data Management & Data Quality systems, Data Warehousing, and reporting infrastructure that sticks.

TECHNICAL SKILLS

Programming Languages: Python (Pandas, Flask, FastAPI, Streamlit), VBA, JavaScript

Database & Cloud: MS-SQL, MongoDB, Azure Data Factory, Snowflake, AWS

Analytics & Dashboards: Power BI, Tableau, SSAS (Tabular), SSIS, SSRS, DAX, Power Apps, Power Automate

Tools: Azure DevOps, Salesforce, MS Visio, BigCommerce, Inflow, Make, Knack

WORK EXPERIENCE

Stonebridge Consulting | Senior Business Intelligence Consultant

Mar 2022 – Present

- **Product Management:** Product manager for Orbit, an internal no-code data movement platform serving 3+ teams. Lead the full product lifecycle, including feature design, resourcing, documentation and testing.
- **BI Project Management:** Led MDM design, data quality remediation, and executive Power BI dashboard delivery across 2 Oil & Gas clients consolidating 6+ source systems into a single trusted reporting layer.
- **Cloud Data Solution:** Led end-to-end delivery of a Public Data PoC using Azure Data Factory, Snowflake and Power BI, showcasing the firm's cloud data practice.
- **Operations Efficiency:** Redesigned e-commerce logistics workflows for oilfield supply operations, reducing order cycle time by 30% and eliminating 100 % manual tracking spreadsheets previously maintained by 2 FTEs.

Stonebridge Consulting | Business Intelligence Consultant

Sep 2017 – Mar 2022

- **MDM Program Lead:** Primary technical support for Enerhub deployments at 7+ enterprise Oil & Gas clients. Authored complex SQL stored procedures and optimized SSAS Tabular models, improving query performance by up to 60% and reducing data quality incident volume by 35% within 6 months of go-live.
- **SCADA Modernization:** Led migration of a client's SCADA analytics environment from MS Access/Excel to Snowflake, then built Power BI dashboards pulling from Snowflake.
- **Strategic Data Assessments:** Delivered enterprise Data Management Assessments for 4+ clients, identifying critical process gaps and delivering implementation roadmaps that became the basis for BI engagement contracts.
- **Enablement & Adoption:** Wrote end-to-end technical training documentation for Enerhub, cutting new-user onboarding time from 3 weeks to under 1 week and enabling staff to independently support clients without escalation.

American Fidelity Assurance Co. | Test Automation Intern

Jan 2017 – May 2017

- Optimized automated testing frameworks through script refactoring, achieving a 50x (5,000%) reduction in test execution time, enabling QA cycles that previously took hours to complete in minutes.

Accenture | Business Analyst

Aug 2013 – Jul 2015

- **Cost Reduction:** Built three IT cost-reduction business cases for Fortune 500 telecom clients, two of which were approved and implemented resulting in 4M+ savings across network transformation programs.
- **Financial Modeling:** Engineered a VBA-based profitability forecasting tool used across Network Transformation engagements, replacing a manual modeling process with an automated 2-hour workflow.

EDUCATION

- **M.S. in Management Information Technology** - University of Oklahoma, Price College of Business, 2017
- **B.Tech. in Electronics and Communication Engineering** – IIIT Allahabad, India, 2013

CERTIFICATIONS

- AWS Certified Cloud Practitioner (2022)
- SAS Certified Predictive Modeler using SAS Enterprise Miner 13 (2017)
